EPSITE 2023

What is EPSITE?

In North America, all trainees are required to take a yearly “in-service” examination. It guides trainees’ education by giving them the opportunity to identify weaknesses and test their knowledge. Until the first EPSITE held on May, 25th 2019, there was no such test in Europe. The European Board of Paediatric Surgery (EBPS) and European Paediatric Surgical Association (EUPSA) created EPSITE to support candidates who wish to prepare themselves to sit in the European Board of Paediatric Surgery Examination or to test their knowledge compared to their level of surgical education among peers.

Similar to the EBPS Part I exam, EPSITE consists of 100 multiple choice questions covering a large spectrum of topics, including

- anatomy, physiology, embryology
- pathology, microbiology, genetics and immunology
- clinical history, examination and operative techniques
- clinical data interpretation
- radiological investigations
- general paediatric surgery
- paediatric oncology
- neonatal surgery
- genitourinary surgery
- paediatric trauma and burn care
- paediatric critical care

Prof. S. Cascio,
Chairman Examination Committee EBPS

Prof. O. Muensterer,
Question Master EBPS

Prof. M. Lacher,
Question Master, Chairman EUPSA
Education Office

Registration?

EPSITE is held on an annual basis 2-3 months prior to the EUPSA Congress and can be taken only once per year. Access is via an online link that will be sent to registered participants and activated on the day of examination.
